

# Beading Strap

## 1. Warp the loom.

See the "Loom Warping - Method 2: for longer woven pieces" in the instructions.

It is better to have double threads for outer warp threads to make the woven piece secured.

## 2. Weave strap to desired length. No diagrams are required to weave this strap, multiple colors and rows can be created as desired.

## 3. Finishing the woven piece.

See the "Finishing Process - Loom Warping Method 2" in the instructions.

## 4. Use jewelry findings on both ends to finish as a strap.

### Tools

- Beading Loom (Art No. 9910)

### Material

- Cylinder beads
- Beading thread
- Jewelry findings
- a slip of paper  
(to ensure warp threads wind evenly)
