The Secret to Smooth Knitting

The Best Selection of Material for Knitting Needles

Bamboo is a strong, elastic and hardy fiber. Its smooth surface and comfortable fit are the most desirable for knitting needles. Only the most premium parts of the bamboo are used for the needles.

Needle Tips are Finished Using a Machine Developed In-house

Our original, easy-to-knit needle tips that prevent yarn splitting have an ideal shape made possible by our self-developed machine. Processes that require precision are still completed manually, one by one.

Strict Quality Control

Each step of Takumi's production process is subject to strict quality standards, and only needles that pass all of these standards are sold. It is thanks to this strict quality control system that Takumi has been a long-selling product since its creation more than several decades ago.
